

By choosing Marked and Bundled Cable, you are able to:

- Customize the wire for each specific project.
- Consolidate multiple reels into one, facilitating an easier pull.
- Eliminate the cost of scrapping excess wire created by using numerous standard length reels.

Break Out Assembly

Wire Type: THHN / XHHW / USE / CAT Cables / FPLP, FPLR / PV / LSZH / and more upon request!

In the event that your project requires terminations at several different locations, MB Cable can provide the Break Out Assembly. The conductors in this staggered configuration are bundled together on one end, and break out where you need them to.

- Tails from the master bundle to required break out points (Tail lengths can vary)
- Conductors can be marked at spacing intervals of 1 to 6 inches in either black or white ink.
- Specific Break Out Assembly with pre-installed connectors for Solar Applications (Ask us about Solar Quick Connect).
- No minimum run quantities.
- Conductors come from one manufacturer guaranteed.

Each bundle consists of conductors from a single manufacturer, ensuring that from the purchasing to the pulling, MB Cable can guarantee you the right product for your job.
