

By choosing Marked and Bundled Cable, you are able to:

- Customize the wire for each specific project.
- Consolidate multiple reels into one, facilitating an easier pull.
- Eliminate the cost of scrapping excess wire created by using numerous standard length reels.

Solar Quick Connect

Available in: THHN / XHHW / USE, RHW / PV / and more upon request!

Designed to your specific requirements, Solar Quick Connects decrease time on installs and increase productivity 5:1 over traditional methods.

- Multiple PV Cables bundled together.
- PV Cable offered in Black, Red, and White (600v and 2000v)
- Custom lengths and breakouts
- Male and female connectors for a quick connection.
- Custom labeling throughout the entire length at 1" intervals, for easy identification. (ie: Positive #1, Negative #1)
- Bundle diameter of 2.5"
- Design for use in a variety of installation types.

Each bundle consists of conductors from a single manufacturer, ensuring that from the purchasing to the pulling, MB Cable can guarantee you the right product for your job.
