

By choosing Marked and Bundled Cable, you are able to:

- Customize the wire for each specific project.
- Consolidate multiple reels into one, facilitating an easier pull.
- Eliminate the cost of scrapping excess wire created by using numerous standard length reels.

## Power   Control   Solar   Communications   Fire Alarm

The Home Depot

JFK Airport - Terminal 4

Lincoln Center, New York City

## Custom Stripped Lengths

- Partially stripped circuit wire - can include one or both ends stripped.
- Ideal for 8" grounding tails
- Installed fork terminal available upon request.
- Short lengths for fixture, ballast, and sockets applications.
- Conductors can be marked.
- Numerous colors for different requirements (Colors vary with wire type).

*Each bundle consists of conductors from a single manufacturer, ensuring that from the purchasing to the pulling, MB Cable can guarantee you the right product for your job.*
