

MB Cable specializes in marking and bundling wire for the electrical industry. The finished product enables you to make a smooth installation quickly. Each step in the quality controlled process is designed to **increase productivity** by facilitating your termination. Cables are marked and bundled together, consolidating multiple reels to one while **saving time** associated with material handling. The custom lengths end costly wire scrap created by using numerous standard length reels. You will **reduce cost** on your next project by eliminating the labor associated with ringing out and marking cables in the field.

● Straight Assembly

- Our standard configuration uses a waxed nylon non-adhesive tape
- THHN, XHHW, USE, Category Cables, FPLP/FPLR
- Can be up to 2" in diameter (Restricts conductor size)
- Conductors are marked (numbers, letters, combinations) at spacing intervals of 1 to 6 inches in either white or black ink
- Conductors can be striped
- Sequential footage marker available upon request
- No minimum run quantities

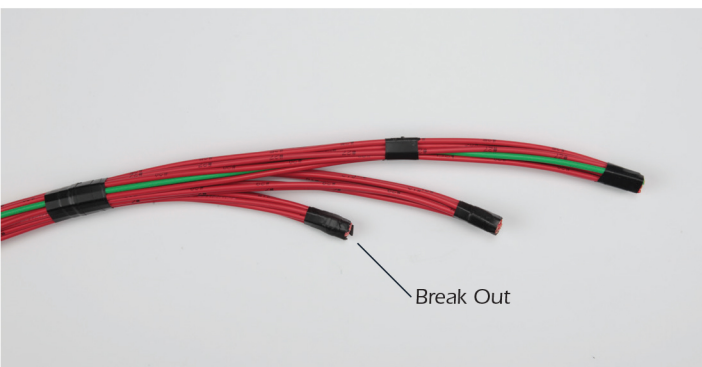

● Cross Taped Assembly

MB Cable offers another solution for those jobs where the spiral wrap is too restrictive. The Cross Tape Assembly holds together our bundles with a pull tab every 5 to 10 feet depending on the customer's preference.

- Bundles secured by electrical tape every 5-10 feet depending on the length of the run
- Tabs are easily removed for a cleaner, faster pull
- Conductors are marked at spacing intervals of 1 to 6 inches in either black or white ink
- No minimum run quantities

● Break Out Assembly

- Bundles that are spiral wrapped or cross taped for established terminations at several different locations
- Tails from the master bundle to required break out points. (Tail lengths can vary)
- Conductors can be marked at spacing intervals of 1 to 6 inches in either black or white ink
- Specific Break Out Assembly with pre-installed connectors for Solar Applications (www.markedandbundled.com- Solar Quick Connect)
- No minimum run quantities

MB Applications

Power

Commercial Office Space for powering Workstations
Large Retail Stores
Casinos

Control

Airport Baggage Systems
Theatrical Lighting
Motor Controls for pumps at WWTPs
Prisons
Generators
Hospital Call Boxes
Ventilation Systems

Solar

Panel to Combiner Box

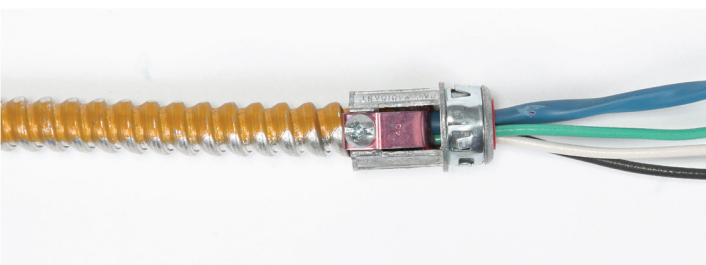

Communications

Fire Alarm

MB GUARANTEE

Each bundle consists of conductors from a single wire manufacturer

Additional Products

Whips

- Cut to length cable with installed snap-in fittings for easy hookups
- Available in MC, AC/BX, MCAP, HCF MCAP, MC-PCS, HCF MC-PCS, PV wire
- Armored Cable Whips available in Low or High Voltage
- Quick turn around on any length

Custom Length Tails

- Partially stripped circuit wire
- can include one or both ends stripped
- THHN, XHHW, USE/RHW, PV
- Ideal for 8" grounding tails
- Installed Fork terminal available upon request
- Short lengths for fixture, ballast and sockets applications
- Conductors can be marked
- Numerous colors for different requirements
(Colors vary with wire type)
